

JAKE HUEBNER

Boulder, Colorado • Dallas, Texas

214-957-2344 • jakehuebner4@gmail.com • [LinkedIn](#) • jakeahuebner.com

EDUCATION

University of Colorado Boulder

Expected July 2026

Bachelor of Arts in Computer Science, Minor in Business

Awarded CU Chancellor's Achievement Scholarship

Awarded Grand Lodge of Texas, A.F. & A.M. Mirabeau B. Lamar Scholarship

Relevant Coursework: Machine Learning, Artificial Intelligence, Data Science & Statistics, Algorithms, Object-Oriented Analysis & Design, Principles of Programming Languages

TECHNICAL SKILLS

Languages: Python, Java, C++, Scala, SQL, HTML/CSS

Tools & Platforms: Git, GitHub, Jupyter, VS Code

Methods & Concepts: Machine Learning, Bayesian Networks, Markov Decision Processes, Q-Learning, Hidden Markov Models, Object-Oriented Design

Frameworks & Libraries: pandas, NumPy, matplotlib

PROJECTS

Running Form Analyzer | Python, MediaPipe, OpenCV, NumPy

- Engineered biomechanical features – joint angles, stride length, cadence – and trained a classifier to flag form faults like overstriding and heel striking
- Diagnosed a session-leakage flaw inflating naive 80/20 accuracy to a misleading 99.7%; re-validated with leave-one-session-out CV and lifted overstride-detection F1 -4× (0.11 → 0.43) by improving data quality

OmniFlow – City Traffic Simulator | Java 17, JavaFX, Gradle, JUnit 5

- Built a real-time 2D traffic simulation engine modeling five polymorphic agent types (cars, buses, emergency vehicles, bikes, pedestrians) via a shared Agent interface
- Implemented simulation behaviors – emergency-vehicle preemption, bus-stop queueing, multi-phase pedestrian crossings – and verified core logic with five JUnit 5 test suites

Mancala AI Agent | Python, NumPy, Matplotlib

- Built a Mancala game-playing AI from scratch in Python – game engine, random baseline, and search agents benchmarked over 100-game tournaments
- Implemented minimax and alpha-beta pruning – a -3.9× speedup at identical win rates that made depth-10 search feasible (plain minimax projected -2 hrs/game)
- Designed a custom heuristic evaluation function crediting end-of-game stone sweeps, raising win rate to 99% at depth 5 (up from 96%)

WORK EXPERIENCE

Cynsational Resources – Remote

3/2026 – Present

Web Developer Intern

- Built a WordPress site for a small-business client, handling layout, content, and styling
- Maintain and update the live site on an ongoing basis based on client needs

Camp Cho-Yeh – Livingston, Texas

5/2020 – 5/2025

Remote Digital Recruiter

9/2023 – 5/2025

- Shortlisted qualified candidates for seasonal camp staff positions
- Screened resumes and conducted interviews to evaluate candidate fit and qualifications
- Reported recruiting progress and pipeline status in weekly team meetings

ACTIVITIES & SERVICE

AGO Fraternity

8/2021 – 5/2026

Christ-centered service fraternity. Elected to progressively senior roles: Chaplain (2022), Secretary (2023), President (2025).

- Led Bible studies, mentored pledge members, and directed chapter operations and volunteer events.

CU Boulder University Choir

8/2021 – 5/2025

Auditioned choral ensemble; performed at Carnegie Hall (2022, 2024) and the Denver Center for the Performing Arts.

Grace Commons Church Volunteer

8/2022 – Present

Youth ministry counselor for ninth graders – weekly meetings for worship, Bible studies and outreach activities.
